

# V-CEPTOR

ADVANCED MOBILE RAPID DEPLOYMENT SOLUTIONS

Ruggedised MIC1-400 colour mono dome with twin directional IR illuminators and 18X optical zoom

- 3G and Wi-Fi connectivity

Stainless steel 6.5 mtr telescopic mast with twin four point stabilising device for maximum wind deflection

- Live broadcast audio

External detection chamber complete with high performance Redwave movement sensors, Audio speaker and 110db Siren protected by detachable anti climb bracket

- protected by Shock Guard sensor system

Unique pyramid design incorporating Integral four leg jacking system with independent levelling, detachable towing arm assembly, wheel removal and storage system, fixed on-board auto brake winching system, secure built-in storage area with separate lockable IP45 equipment cabinet

?V-Ceptor high view model extremely robust and secure from attack

## SPECIFICATION

- LIVE VIDEO TRANSMISSION
- VIDEO MOTION DETECTION
- 3G - WIFI CONNECTIVITY
- FULL DUPLEX AUDIO
- HIGH OUTPUT SPKRN
- AUTO ALARM PRESETS
- FULL CONTAINED DVR
- INTEGRAL UPS
- 7 DAY ARM DISARM SCHEDULE
- REMOTE CONFIGURATION
- 1 - 8 CAMERAS
- 1 YEAR WARRANTY

## OVERVIEW

THE V-CEPTOR SYSTEM IS A FULLY INTEGRATED MOBILE REMOTE VIDEO SECURITY SOLUTION. IT HAS BEEN DESIGNED TO BE TOTALLY TRANSPORTABLE AND CAN BE RE-DEPLOYED AS FREQUENTLY AS REQUIRED ON MULTIPLE SITES. THE V-CEPTOR SOLID STATE TRAILER SYSTEM PROVIDES A PLATFORM WHICH BOTH TRANSPORTS THE SYSTEM FROM SITE TO SITE AND, WHEN IN DEPLOYED-MODE, FORMS A SELF-CONTAINED SECURE WORKING PLATFORM FUNCTIONING AS A FULLY INTEGRATED REMOTE VIDEO SYSTEM. THE SYSTEM UTILISES THE LATEST WIRELESS TECHNOLOGY, PRIMARILY DESIGNED TO WORK IN AREAS WITHOUT FIXED WIRED COMMUNICATIONS OR A PERMANENT POWER SOURCE. THE SYSTEMS UNIQUE DESIGN ALLOWS IT TO BE SET UP ON SITE BY ONE OPERATOR. THE V-CEPTOR CAN THEN REMAIN DEPLOYED FOR AS LONG AS REQUIRED.
